Five Companies, LLC selected to provide construction of yard piping for the City of Houston's Northeast Water Purification Plant

HOUSTON, TX (November 2019): Houston-based civil construction firm, **Five Companies, LLC** was selected to complete the yard piping construction for the City of Houston's Northeast Water Purification Plant (NEWPP). Under this contract, Five Companies will work with PLW Waterworks to install 121,000 LF of water line, including large diameter water lines from 84" to 120". Sequencing of Five Companies' work will be crucial to ensure the program remains on schedule. The firm intends to have Phase I Yard Piping constructed through 2020 and Phase 2 constructed through 2021 to early 2022.

"This is a perfect project for Five Companies," states Managing Principal, Mark Boyer. "Through this project, we will have the chance to showcase the capabilities of our team members. Helping to complete this critical piece of the City of Houston's water planning will be a career highlight for every one of our team members. We look forward to the challenge."

About the NEWPP:

Currently the nation's largest progressive design-build water plant project, the City of Houston's Northeast Water Purification Plant (NEWPP) expansion project consists of two design-build phases to expand the plant's capacity from 80 million gallons per day (MGD) to 400 MGD by 2024. The expansion project, valued at \$1.8 billion, will help the City and water authorities meet water demands, and fulfill requirements by the Harris-Galveston and Fort Bend Subsidence Districts that restrict groundwater usage.

The four partner agencies involved in the project include: North Harris County Regional Water Authority, Central Harris County Regional Water Authority, West Harris County Regional Water Authority and North Fort Bend Water Authority.
